IMPRESSIVE STORY OF GRAM GAMES

IMPRESSIVE STORY OF GRAM GAMES

Gram Games Teknoloji A.Ş. (Gram Games), one of the pioneers in game sector with offices in Istanbul and London, has been acquired by Zynga Inc, world's giant game developer, for 250 Million Dollars cash and earn outs.

Recently developed Merge Dragons! was one of the most earning games of Gram Games, also hit the headlines with their other games like Six!, 1010! and Bounzy!

Company co-founder and CEO, Mehmet Ecevit, stated that they are proud of combining the Gram Games culture they created successfully from 2012 to today and their games and

talented teams working in Gram Games studios in Istanbul and London with Zynga's world-class global organization. He expressed that, as the Gram Games family, they are so excited to start working together with Zynga and they believe deeply in Zynga's mission to connect the world through games.

The other co-founder and Chairman of the Board, Kaan Karamancı, stated that, they are one of most successful puzzle game developers with their games such as 1010! and Six!, and the Merge Dragons! has made an overwhelming impression on game market. In addition, they continue to delight millions of players with their new games. He expressed that such sharing is a source of pleasure and motivation for them.

Zynga, on the other hand, declared that they have been impressed by the Gram Games team's unique culture and innovative approach to game creating methods; and Gram Games develops enjoyable, easy to play, and addictive games.

As legal counsels to Gram Games, we are aware that this is an exceptional success story when a company established in 2012 has evolved into a multi-million dollar company in just five years and it is a pride for us to represent Gram Games since its foundation. We are very proud to have contributed to make a name of our country around the world.

A Glance at the Games

Move the hexagon down the screen by tapping the blocks below it to destroy them. However, here's where it gets tricky: if you tap the wrong blocks, the hexagon can get thrown off balance. If the shape wobbles to far right or left, it will fall off the tower of blocks, and that's game over! Sounds simple? Play and think again!

Another puzzle game! Clear the blocks by creating full lines on the screen both vertically and horizontally after placing the pieces. Attention: Some pieces can cause a mess. Break your own records!

Answers. Not theories.
